Problem 1. Determine the language of the following right-regular grammar by eliminating its nonterminal symbols (in any order) until you are left with a regular expression. The start symbol is $S$.

$$S \rightarrow A \quad A \rightarrow \epsilon \mid 0A \mid 1B \quad B \rightarrow 0C \mid 1D \quad C \rightarrow 0A \mid 1D \quad D \rightarrow 0D \mid 1C$$
